

Xerox Replacement Cartridges

Why to Buy...

Vol 1 No. 3

Fast facts that will help you decide...

Xerox is committed to protecting the health, safety, and well-being of all those who utilize our products, and Xerox Replacement Cartridges are no exception.

Prior to offering Xerox Replacement Cartridges in the marketplace, Xerox Environment Health & Safety (EH&S) conducts a comprehensive analysis to ensure that they do not contain hazardous materials that could prove harmful to people or to the environment. EH&S also ensures that all legal statutes are met, regardless of geography.

As more companies in different parts of the world move into cartridge manufacturing, isn't it reassuring to know that Xerox Environment Health & Safety has validated that Xerox Replacement Cartridges are safe for you, safe for your customers, and safe for the environment?

Talk it up.

Health and Safety. It matters to *all* of us.

- Each replacement cartridge offering is approved by Xerox Environment Health & Safety
- Additional information such as physical data, health effects, and disposal procedures for each product are found in the *Material Safety Data Sheet* located on www.xerox.com

Remember that no matter whose cartridge you buy, it's about far more than supplies. The true value lies in our commitment to innovation, quality and sustainability.
